

# Our Project Homework - Year 3 Autumn 2

Choose 2 activities to complete across the half term.

## Art

### Prehistoric Painting

Can you use natural materials to replicate a piece of prehistoric art?

Think about:

- What type of images did they paint?
- What materials did they have available to use?
- What colours did they use?

## History

### The Stone Age

Can you replicate one of these Stone Age tasks:

- Sewing
- Fire making (with an adults help)
- Fishing (pond/river dipping would do)
- Cooking/making something without using an oven.
- Skinning a kiwi fruit (pretend it is a mammoth).

Don't forget to research how and what they would have used to complete the tasks!

Think about why we don't need to do this (as much) anymore?

## Music

### Create a Piece of Music

Using pots, pans, cups and other things in your house create a piece of music.

Ensure there are different pitched sounds, a clear rhythm and beat!

Please video these and send them in or take photos/draw your set up.

## Science

### Skeletons and Movement

Your challenge is to make a human skeleton!! Can you make it move?

Research why and how our skeleton helps us.

Be creative when presenting your work.
