

Anton Junior School Progression in Calculation

Addition				
	Year 3	Year 4	Year 5	Year 6
End of year expectations	Add numbers with up to 3 digits using the formal written methods of columnar addition.	Add numbers with up to 4 digits using the formal written methods of columnar addition.	Add whole numbers with more than 4 digits, including using formal written methods (columnar addition).	Solve addition and subtraction multi-step problems in contexts, deciding on which operations and methods to use and why.
<p>Developing written methods (conceptual understanding).</p> <p>Children should also understand that addition can be done in any order.</p> <div style="text-align: center; margin: 10px 0;">  </div> <p>Bar model to help link addition and subtraction.</p>	<p>Without carrying: Using Numicon, model place value and adding without carrying. Model adding from right to left (ones, tens, hundreds, etc.)</p> <div style="text-align: center; margin: 10px 0;">  </div> <p>Using Dienes and then place value counters, model place value and adding without carrying.</p>	<p>Secure Year 3 methods. Moving on to securing formal column method for up to 4 digits.</p> <div style="text-align: center; margin: 10px 0;">  </div> <p>Model lining up the digits when numbers have different number of digits.</p> <p>Moving onto adding more than two numbers using the formal written method.</p> <p>Estimations should be taught in Year 4.</p>	<p>Secure formal written method for larger numbers and with decimals in context. (Dienes or place value counters can support here)</p> <div style="text-align: center; margin: 10px 0;">  </div> <p>Model how to line the digits up correctly.</p> <div style="text-align: center; margin: 10px 0;"> $\begin{array}{r} \pounds 1.75 \\ + \pounds 2.36 \\ \hline \pounds 4.11 \\ \text{1 1} \end{array}$ </div>	<p>Use formal written method for large numbers, different sized numbers and decimals in different contexts. Model inserting zeros as place holders.</p> <div style="text-align: center; margin: 10px 0;">  </div> <div style="text-align: center; margin: 10px 0;"> $\begin{array}{r} 237.400 \\ + 6.351 \\ + 0.920 \\ \hline 244.671 \\ \text{1 1} \end{array}$ </div>

Anton Junior School Progression in Calculation

With carrying:
Model how to carry/exchange using Dienes and place value counters (10 ones for a ten and 10 tens for a hundred).

Anton Junior School Progression in Calculation

Expanded method using partitioning:

$$\begin{array}{r} 20 + 5 \\ 40 + 8 \\ \hline 60 + 13 = 73 \end{array}$$

Then with carry/exchange:

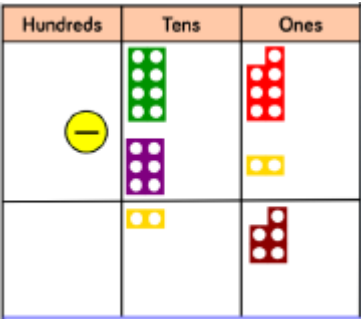

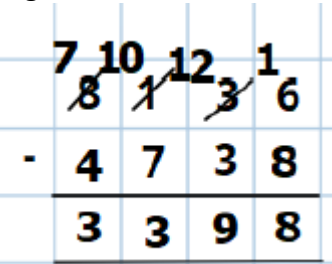

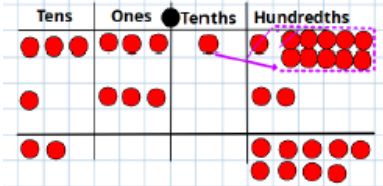

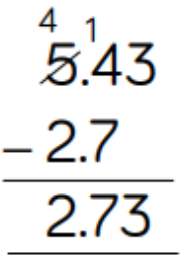

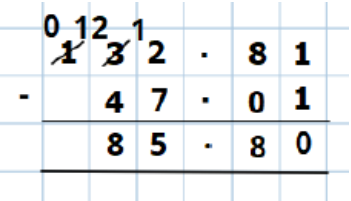

$$\begin{array}{r} 40 + 6 \\ \underline{20 + 7} \\ \underline{70 + 3} = 73 \\ 10 \end{array}$$

Finally model formal column addition demonstrating carrying/exchanging for up to 3 digits:

$$\begin{array}{r} 25 \\ + 48 \\ \hline 73 \\ \hline 1 \end{array}$$

Anton Junior School Progression in Calculation

Subtraction				
	Year 3	Year 4	Year 5	Year 6
End of year expectations	Subtract numbers with up to 3 digits using the formal written methods of columnar subtraction.	Subtract numbers with up to 4 digits using the formal written methods of columnar subtraction.	Subtract whole numbers with more than 4 digits, including using formal written methods (columnar subtraction).	Solve addition and subtraction multi-step problems in contexts, deciding on which operations and methods to use and why.
<p>Developing written methods (conceptual understanding).</p> <div style="text-align: center; margin: 10px 0;">  </div> <p>Bar model to help link addition and subtraction.</p>	<p>Without exchanging Using Numicon, model place value and subtracting without carrying. Model subtracting from right to left (ones, tens, hundreds, etc.)</p> <div style="text-align: center; margin: 10px 0;">  </div> <p>Using Dienes and then place value counters, model place value and adding without carrying.</p>	<p>Secure Year 3 methods. Moving on to securing formal column method for up to 4 digits.</p> <div style="text-align: center; margin: 10px 0;">  </div> <p>Model lining up the digits when numbers have different number of digits. Children also need to be taught how to exchange when there are zeros.</p> <p>Estimations should be taught in Year 4.</p>	<p>Secure formal written method for larger numbers and with decimals in context. (Dienes or place value counters can support here)</p> <div style="text-align: center; margin: 10px 0;">  </div> <p>Model how to line the digits up correctly.</p> <div style="text-align: center; margin: 10px 0;">  </div>	<p>Use formal written method for large numbers, different sized numbers and decimals in different contexts. Model inserting zeros as place holders.</p> <div style="text-align: center; margin: 10px 0;">  </div>

Anton Junior School Progression in Calculation

Hundreds	Tens	Ones
—		

Hundreds	Tens	Ones
—		
=		

With exchanging:
Model how to exchange using
Dienes and place value
counters (10 ones for a ten
and 10 tens for a hundred).

Hundreds	Tens	Ones
—		
=		

Using inverse operations to
check answers.

Anton Junior School Progression in Calculation

Expanded method using partitioning:

$$\begin{array}{r} 40 \quad 6 \\ - 20 \quad 2 \\ \hline 20 \quad 4 = 24 \end{array}$$

Then with exchange:

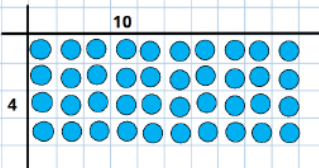

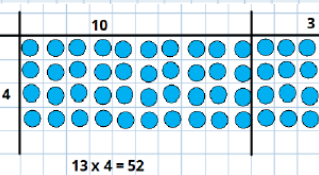

$$\begin{array}{r} 30 \quad 16 \\ \cancel{40} \quad 6 \\ - 20 \quad 2 \\ \hline 10 \quad 9 = 19 \end{array}$$

Finally model formal column subtraction demonstrating exchanging for up to 3 digits:

7	1	3	6
-	8	5	4
<hr/>			
5	8	2	

Anton Junior School Progression in Calculation

Multiplication																																																																																																																																																																												
	Year 3	Year 4	Year 5	Year 6																																																																																																																																																																								
End of year expectations	<p style="text-align: center;">Write and calculate mathematical statements for multiplication using the multiplication tables they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods.</p>	<p style="text-align: center;">Multiply two-digit and three-digit numbers by one-digit number using formal written method.</p>	<p style="text-align: center;">Multiply up to 4 digits by a one-digit or two-digit number using a formal written method, including long multiplication for two-digit numbers.</p>	<p style="text-align: center;">Multiply up to 4 digits by a two-digit number using a formal written method of multiplication.</p>

Anton Junior School Progression in Calculation

Move onto Dienes to support grid method understanding and then place value counters:

13 x 4 = 52

4 x 124 = 496

Grid method:

x	100	20	4
4	400	80	16

4	0	0	0
+	8	0	0
	1	2	0
4	9	6	0

4 x 124 = 496

Children need to be taught how to multiply by a multiple of 10 and 100. They also need to be shown how to add up the numbers from the grid.

Grid method for multiply by a number with more than one digit:

x	100	20	4
40	4000	800	160
3	300	60	12

4	0	0	0
+	8	0	0
	1	6	0
	3	0	0
	6	0	0
	1	2	0
5	3	3	2

43 x 124 = 5332

7.3 x 2 = 14.6

Once grid method for multiplying by a number with more than one digit is secured, move to expanded:

3	2	6
x	2	3
	1	8 (3 x 6)
	6	0 (3 x 20)
	9	0 0 (3 x 300)
	1	2 0 (20 x 6)
	4	0 0 (20 x 20)
6	0	0 0 (20 x 300)
7	4	9 8

Then progress to the formal written method for long multiplication:

	H	T	O
		2	2
x		3	1
		2	2
	6	6	0
	6	8	2

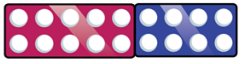

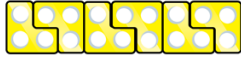

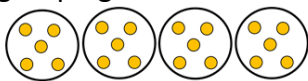

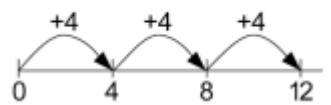

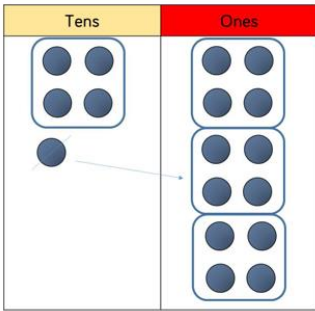

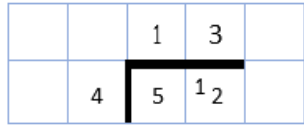

Using formal written methods to multiply a decimal by a two or three digit number:

	3	9	8
x	1	2	0
	7	9	6
+	3	9	8
	4	7	7
	6	0	0

Teach children how to multiply question to make a whole number, then use the inverse (division) to divide the answer.

Anton Junior School Progression in Calculation

Division																																																				
	Year 3	Year 4	Year 5	Year 6																																																
End of year expectations	<p style="text-align: center;">Write and calculate mathematical statements for division using the times tables they know, progressing to formal written methods.</p>		<p style="text-align: center;">Divide numbers up to 4 digits by a one-digit number using a formal written method for short division and interpret remainders appropriately for context.</p>	<p style="text-align: center;">Divide numbers up to 4 digits by a two-digit number using a formal written method for long division and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context.</p>																																																
<p>Developing written methods (conceptual understanding).</p>	<p>Using Numicon:</p>  <p style="text-align: right; margin-right: 20px;">$18 \div 3 = 6$</p>  <p>Understanding division as grouping:</p>  <p style="text-align: right; margin-right: 20px;">$20 \div 5 = 4$</p> <p>Understanding division as repeated addition:</p> <p>$12 \div 4 = 3$</p> 	<p>Method moving towards standard written method using Dienes to support:</p>  	<p>Secure short division with no remainders.</p> <p>Use short division method interpreting remainders in context and moving onto recording remainders as a fraction:</p> $\begin{array}{r} 86 \text{ r}2 \\ 5 \overline{) 432} \end{array}$ <p style="text-align: center;">Answer: 86 remainder 2</p> $\begin{array}{r} 45 \text{ r}1 \\ 11 \overline{) 496} \end{array}$ <p style="text-align: center;">Answer: $45 \frac{1}{11}$</p>	<p>Secure short division with fraction remainders.</p> <p>Teach formal long division method for up to four digits by two digits. Start with no remainders. Anton Junior School Progression in Calculation

Grouping on a number line:

Use partitioning with no remainders – start with place value counters:

		2	1	4
4	8	5	16	

Introduce decimal remainders:

$$142 \div 4 = 35.5$$

$$\begin{array}{r} 035.5 \\ 4 \overline{)142.0} \end{array}$$

Answer: 28.8

Anton Junior School Progression in Calculation

Children need to recognise when to use multiples of 10 to solve a problem

e.g. $72 \div 3$

$$60 \div 3 = 20$$

$$12 \div 3 = 4$$

$$20 + 4 = 24$$

Partitioning with remainders:
